

# Dental X-Ray Analysis Report

Generated: June 18, 2025

## Summary

Oral Health Score: 31/100 - Critical

## Full X-Ray Analysis

## Detailed Findings

Condition	Number of Teeth	Severity
Caries	2	Medium
Periapical Lesion	1	High
Deeper Caries	1	High

### Caries (2 teeth)

Recommendation: Early cavity detected. Treatment options include fluoride treatments or small fillings. Schedule a follow-up appointment soon.

### ***Periapical Lesion (1 teeth)***

Recommendation: Infection detected at tooth root. Root canal treatment needed. Contact your dentist promptly.

### ***Deeper Caries (1 teeth)***

Recommendation: Advanced decay detected. Will likely require root canal therapy or extensive restoration. Prompt treatment recommended.

## **Recommendations**

- Schedule a follow-up with your dentist to discuss these findings.
- Caries: Early cavity detected. Treatment options include fluoride treatments or small fillings. Schedule a follow-up appointment soon.
- Periapical Lesion: Infection detected at tooth root. Root canal treatment needed. Contact your dentist promptly.
- Deeper Caries: Advanced decay detected. Will likely require root canal therapy or extensive restoration. Prompt treatment recommended.
- Maintain good oral hygiene: Brush twice daily, floss daily, and use mouthwash.

- Reduce sugar intake to prevent further decay.
